TS SERIES REVERSE OSMOSIS WATER SYSTEMS

TS300 • TS600 • TS1200

Kinetico's TS Series Reverse Osmosis Systems are ideal when high quality water is in need, space is at a premium and you need to conserve water.

How are the TS Series Reverse Osmosis Systems different?

- Advanced Filtration. Delivers high quality pure water to your application by removing total dissolved solids (TDS).
- Capacity Range. 300 to 1200 gallons per day of high quality water.
- Efficient Water Production. Designed to maximize water conservation.
- Space-Saving Design. Requires minimal floor space.
- Expandable System. Add membrane modules to increase production up to 1200 gallons per day.
- Optional EverClean' Rinse. Cleans the system's membrane with high quality permeate water upon shutdown to protect water quality and prolong the membrane's life.
- Optional Accessories:
 - Carbon Filtration provides chlorine removal for extended membrane life and improved product water quality.
 - Filtration improves feed water quality by removing excessive solids.
 - Softening increases reverse osmosis performance by removing hardness fouling, extending membrane life and improving water quality.
 - Storage and Repressurization systems provide a constant supply and pressure of high quality water.
